SUMMARY

Game developer with 7 years of experience building gameplay systems and optimizing Roblox and Unity games

EDUCATION

Software Engineer Sep 2015 - Oct 2020
University of Information Technology

SKILLS

C#, Lua, Unity, Roblox, Git, Codex

WORK EXPERIENCE

Roblox Developer Jun 2023 - Present
Hiptech, Hồ Chí Minh

- Developed multiplayer Roblox experiences, including multiple minigames, pet RPG systems, shops, inventory, mailbox, and daily quests.
- implemented limited-time competitive events by customizing minigames with point-based leaderboards and UGC rewards.
- Inspected 3D models for mesh defects and checked them against Roblox UGC and avatar accessory requirements.
- Implemented matchmaking and teleportation between Roblox servers and experiences.
- Developed server-side validation, player-data handling, and anti-cheat systems.
- Debugged and optimized performance, memory, and asset loading.
- Optimized world loading with StreamingEnabled.

Unity Developer Jan 2024 - Sep 2026
TDC game, Ha Noi

- Developed gameplay systems for Idle Defense and Simulator games in Unity.
- Implemented Addressables for efficient asset loading and content management.
- Implemented Photon networking for multiplayer PvP game modes.
- Ported the project to WebGL and developed custom browser integrations for web-specific functionality.
- Optimized draw calls, shaders, VFX, build size, and memory usage.
- Investigated and diagnosed production crashes using Firebase.

Unity Developer Feb 2020 - Jun 2023
Wejoy Game Studio, Hồ Chí Minh

- Developed gameplay systems for casual and puzzle games in Unity.
- Optimized rendering performance and custom shaders; improved VFX.
- Optimized build size and memory usage.
